About This Content

The classic Class 31 diesel locomotive was a versatile workhorse of the British railway network, and now this Brush Type 2 is available for Train Simulator in BR Railfreight Sector and preserved BR Green liveries.

British Railways' 'Pilot Scheme' to replace steam traction saw 20 Type 2 diesel locomotives built by Brush Traction in 1957. These development locomotives were fitted with Mirrlees engines and had a top speed of 80mph, designed for mixed traffic workings on the Eastern Region. Midway through production, BR decided to extend the fleet, ordering a further 243 locomotives that entered service by the end of 1962.

The main production locomotives were adapted slightly from their predecessors and underwent a programme of re-engineering in 1964 to replace the unreliable Mirrlees engines with higher rated, more powerful English Electric engines. The Class also made its way into other regions of the railway network, becoming a popular sight on both the Western and London Midland regions.

With the demise of British Rail, Class 31s were gradually retired and scrapped, although many were bought by private operators including EWS, Fragonset Railways and Mainline Rail. Network Rail still maintains a small fleet of the Class for test and engineering trains.

The Class 31 for Train Simulator is available in BR Railfreight Sector livery (with and without mini snow ploughs) and BR Green livery, and features include upgraded TSX features, two-tone horn, cab lighting, BR Mk1 coaches and Sealion ballast hoppers.

The locomotive is also Quick Drive compatible, giving you the freedom to drive the Class 31 on any Quick Drive enabled route for Train Simulator, such as those available through Steam. Also included are scenarios specifically for the [Settle to Carlisle](#) route (available separately and required to play these scenarios).

Scenarios

Three scenarios for the Settle to Carlisle route:

- Class 31 Tutorial
- Carlisle Special
- Ribbleshead Ballast

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

- Upgraded TSX effects
- Two-tone horn
- Cab lighting
- BR Mk1 coaches with passenger view
- Sealion ballast hoppers
- Quick Drive compatible
- Scenarios for the Settle to Carlisle route
- Download size: 154mb

Title: Train Simulator: BR Class 31 Loco Add-On

Genre: Simulation

Developer:

Dovetail Games

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date: 23 May, 2013

b4d347fde0

Minimum:

OS:Windows® Vista / 7 / 8

Processor:Processor: 2.8 GHz Core 2 Duo (3.2 GHz Core 2 Duo recommended), AMD Athlon MP (multiprocessor variant or comparable processors)

Memory:2 GB RAM

Graphics:512 MB with Pixel Shader 3.0 (AGP PCIe only)

DirectX®:9.0c

Hard Drive:6 GB HD space

Sound:Direct X 9.0c compatible

Other Requirements:Broadband Internet connection

Additional:Quicktime Player is required for playing the videos

English

A wonderful diesel loco to drive with good sounds accompanying it too. If you like the diesel era of British Rail then this is one DLC you should buy.. You really need the class 31 if you like the early-mid Diesel era.. These locos are lovely. They even have a 2 tone horn which i never knew about. :P
